

Otrinanda Gandhi

Frontend Developer | Design Systems & Accessibility Specialist

Jakarta, Indonesia | otrinanda31@gmail.com | [linkedin.com/in/otrinanda-gandhi](https://www.linkedin.com/in/otrinanda-gandhi) | portfoliotri.vercel.app

PROFESSIONAL SUMMARY

Middle Frontend Developer with 5+ years of experience specializing in Design System architecture (Atomic Design), Accessibility (a11y / WCAG), and scalable React.js/TypeScript ecosystems. Proven track record building component libraries and modular service layers adopted across multiple teams. Passionate about developer experience, UI consistency, and inclusive interface design.

WORK EXPERIENCE

Hyperscal Indonesia July 2025 – Present

Middle Front End Developer

- Led FE Utils Team in building the shared component foundation in less than 8 months, serving 2 teams to deliver 7 modules supporting BSS platform functionality (telco industry).
- Co-led architectural decision to adopt Atomic Design with hybrid primitive components (custom + minimal external dependencies), establishing a design system that enforces UI consistency, WCAG-compliant accessibility, reusability, and flexible customization from the component level up.
- Built a monorepo of 150+ UI components and schema-driven Data View, Form Generator, and Filter libraries — enabling dynamic UI rendering from JSON schemas and reducing integration effort for consuming teams.
- Established clear component ownership boundaries, contribution guidelines, and documentation across 3 frontend teams (15+ developers) — enabling consuming teams to focus entirely on feature logic and backend integration, accelerating overall delivery velocity.

Telkom Indonesia – Tribe Big Data & Smart Platform December 2024 – March 2025

Middle Front End Developer

- Developed Big Legal, an AI-powered SaaS platform for legal document management, using React.js, TypeScript, and Tailwind CSS — ensuring responsive design and cross-browser compatibility.
- Implemented accessible (a11y / WCAG-compliant) UI components using Telkom's Legion Design System, reducing development time by 30% through modular, reusable code.
- Designed a modular service layer with TypeScript and mock data to streamline API integration for AI-driven search and drafting features, enabling scalability for 100+ internal users.
- Delivered a user-centric MVP within 2 months by collaborating closely with UX designers, applying UX/UI principles for performance and scalability.

Telkom Indonesia – Digitalpass Team (Digital Operation & Assurance) March 2024 – December 2024

Middle Front End Developer

- Refactored 50% of the Digitalpass codebase – a ticketing platform handling 50+ monthly submissions – using Nuxt.js and Vue Bootstrap, improving performance by 30% and reducing bugs by 40%.
- Rebuilt responsive UI with REST API and Firebase integration, ensuring cross-browser compatibility and seamless data flow.
- Applied UX/UI principles and component-based design patterns to enhance code modularity, boosting maintainability and developer productivity.

Telkom Indonesia – Tribe Agree (Digital Business & Technology) October 2020 – March 2024

Junior Front End Developer

- Designed and built Agree Market and Agree Mart, B2B/B2C marketplaces, using React.js, Next.js, and TypeScript – delivering responsive, user-centric interfaces for 100+ daily users.
- Optimized transaction features with API integration, increasing user conversion by 25% and achieving 90% customer satisfaction.
- Developed cross-browser compatible UI components, applying accessibility (a11y) and UX/UI principles to enhance usability and performance.
- Contributed to CMS and business dashboards, streamlining operations through modular, maintainable code.

TECHNICAL SKILLS

Expert: React.js · TypeScript · JavaScript · Tailwind CSS · HTML5 · CSS3

Proficient: Next.js · Vue.js · Nuxt.js · Redux · Zustand · Shadcn UI · Bootstrap · Framer Motion

Familiar: Firebase · Angular · Flutter · Storybook · Docker

Tools & Workflow: Git · NPM · Webpack · CI/CD · Agile/Scrum

Specialized Competencies:

- Design Systems: Atomic Design, component governance, token architecture, contribution guidelines
- Accessibility (a11y): WCAG 2.1, ARIA-compliant components, focus management, screen reader testing
- Responsive Design: Mobile-first, adaptive interfaces across diverse devices
- API Integration: Modular service layers for REST and Firebase connectivity
- Performance Optimization: Code refactoring and rendering optimization for faster load times
- Testing: Unit testing with Jest and React Testing Library

EDUCATION

Telkom University August 2015 – November 2019

Bachelor of Electrical Engineering

GPA: 3.34 / 4.00

- Final Project : IoT-based smart hydroponic system with a real-time web monitoring interface.
- Published research at IEEE IOT AIS Conference (2019).

CERTIFICATIONS & ACHIEVEMENTS

- Google UX Design Professional Certificate (Coursera, 2024)
- Published IoT research at IEEE IOT AIS Conference (2019)
- Developed smart hydroponic system for PTUPT Kemenristekdikti research grant (2019)

ORGANIZATIONS & LEADERSHIP

Head of Bureau, UKM Jurnalistik Aksara, Telkom University (2018–2019)

Led a team of 10 to produce campus publications, developing communication and project management skills.

Public Relations Staff, Microsoft Virtual Team Branch, Telkom University (2017–2018)

Coordinated tech events, fostering collaboration and stakeholder engagement.
